Dimensions (LxWxH)	: 300mm x 110mm x 250mm

Licence requires optional Xray Body Apron

Illustrative pic only

WHICH PORTABLE XRAY IS RIGHT FOR YOU?

Frequently Asked Question – Which one is better Between HyperLight-G and V-Light

FEATURES	HYPERLIGHT/V-LIGHT	HYPERLIGHT-G	WINNER
Picture			V-LIGHT
Tube Voltage (kv)			SAME
Tube Current (mA)	2.5	2	SAME
Focal Spot (mm)	0.4	0.7	V-LIGHT (Smaller is better)
Exposure Time Range (Sec)	0.02 – 2	0.02 – 2	SAME
Maximum Duty Cycle	1:30	1:30	SAME
Gross Weight (kg)	1.8	1.9	V-LIGHT (Lighter)
Battery	Up to 500 shots (Exposure time: 0.5s)	Up to 300 shots (Exposure time: 0.5s)	V-LIGHT (40% More Capacity)
Smart Angulation System	✓	✓	SAME
Dimension (LxWxH)	L:300mm W:110mm H:250mm	L:300mm W:110mm H:250mm	SAME

WHATS THE FACTS!

The focal spot size directly impacts the spatial resolution and image quality of the resulting X-ray images.

Smaller the focal spot the Sharper the image.

Our V-Light (0.4mm) is more superior to Hyper Light-G (0.7mm)

Our V-Light now comes with the back scatter radiation Shield

WHY CHOOSE V-LIGHT?

LIGHTER & MORE PORTABLE
Weighs less for effortless handling and mobility.

LONGER BATTERY LIFE
40% more shots per charge for uninterrupted performance.

SHARPER IMAGES
Smaller focal spot (0.4mm) delivers crisper, high-resolution images.

BUILT-IN PROTECTION
Comes with Backscatter Radiation Shield for safe operation.

SMART ANGULATION
Built-in intelligent angulation for perfect positioning every time.

DENTEX®

INNOVATIVE SOLUTIONS FOR A BRIGHTER SMILE

DX. Whiten

LIGHT CURE DENTAL COMPOSITE RESIN

Perfect Smile,
Naturally

DX. Whiten composite belongs to Enamel shade composite system. In clinic practice, two or three kinds of veneer whitening composites are used to repair veneer. The whitening simulation is successfully achieved with nature tooth appearance.

- Discolored veneer and composite inlay

ADVANTAGES

- Three shades of stratified filling to rebuild the layering of tooth
- High simulation, natural aesthetic and excellent coverage
- Good polishability and durability

DENTEX®

INNOVATIVE SOLUTIONS
FOR A BRIGHTER SMILE

DEN CEM HANDMIX OR AUTOMIX

Self Adhesive Dual Cure Resin Cement

ADVANTAGES

HIGH BONDING STRENGTH
Compare with glass ionomer cement, DEN CEM II has good bonding strength and flexural strength.

ECONOMIC
One set can be used to fix at least 100 teeth. It is more economic in comparison with automix design.

CHEMISTRY STABILITY
Liquid and powder are designed to be packed in separate bottles. The chemistry properties are more stable and can be stored in normal room temperature and no need of refrigeration.

DUAL CURE
Light cure and self cure for better choice.

LOW SOLUBILITY
Radiopaque
Fluoride releasing

INDICATION FOR USE :

DEN CEM II is suitable for cementation of crown and bridge which made of PFM or Zirconia. It is a liquid-powder form.

COMPLIANT

NATIONAL ENVIRONMENT MANAGEMENT ACT, 1998
ACT NO. 107 OF 1998

EFFECTIVE
31 MARCH 2025

DEADLINE
31 MARCH 2026

All dental facilities are required to comply with best management practices and requirements to operate and maintain an amalgam separator according to its manufacturer's recommendations, as required by the Act.

DEADLINE HAS NOW PASSED

mercury

5. PHASING-DOWN DENTAL AMALGAM

1. Dental amalgam may only be used in pre-dosed encapsulated form which may not exceed 0.58 ml.
2. A person or an organ of state that owns or is in control of a dental facility in which dental amalgam is used, or where dental amalgam fillings or teeth containing such fillings are removed, must ensure that their fixed facilities are equipped with amalgam separators for the retention and collection of amalgam particles, including those contained in used water.
3. The dental facilities referred to in subregulation (2) must ensure that amalgam separators in use from 1 April 2026, provide a retention level of at least 95% of amalgam particles.
4. Amalgam separators must be maintained in accordance with the manufacturer's instructions to ensure the highest rate level of retention.
5. A dental practitioner may not release amalgam directly or indirectly into the environment under any circumstances.
6. A person or an organ of state that import or export dental amalgam capsules, must develop a Mercury Phase-down for Mental amalgwn Plan for dental amalgam.

AMALGAM SEPERATOR

- Global certification, TUV tested,
- complies to BS EN ISO
- 2 year parts warranty
- This is Europe's most cost effective Amalgam separator

ADVANCED SOLUTIONS FOR IMPLANT SUCCESS

ACCURATE • SMART • EFFECTIVE • RELIABLE

GRAND LAUNCHING OFFER!

IMPLANT STABILITY METER

A stability measuring device that uses tapping method, which measures the time of the Tapping Rod of the device contacting the implant. Used for dentistry and dental implantology or oral cavity, or abutment, to measure the stability.

The result of the measurement is displayed in ISQ scale (Implant Stability Test), which is the numerical representation of the ISQ value, and higher scale represents greater implant stability or lower implant mobility.

FEATURES

- Convenient usage due to small and light design
- Easy to use due to simple controlling method
- Fast measuring time less than 3 seconds
- Safe measurement due to slight tapping technique and auto safety system (tapping stops after tapping twice when Osseointegration is unstable, otherwise taps up to 6 times.)
- Available to check possibility of implant failure at in earlier stages

R24,900

This model is much simpler to use than the NSK model.

With the NSK model, you need to install a probe on the implant first. With this model, you can see the ISQ value on the display screen by gently tapping the implant.

From the numerical value determine the stability of the implant.

IMPLANT LOCATOR

R9,900

- Handy piece of equipment in Implant Dentistry
- Especially for 2 stage dental implant surgery
- Can have a minimal invasive uncovering of the implant with the Locator
- No more Guess Work !
- Work faster, easier, simpler and smarter !!

EASY TO USE

ACCURATE MEASUREMENT

MINIMAL INVASIVE UNCOVERING

IMPLANT UV ACTIVATOR

- It can use vacuum ultraviolet rays to catalyze and activate the surface activity of implants
- Improve the rate of osseointegration
- Shorten the time of bone healing
- Accelerate the clinical osseointegration of dental implants and improve the success rate of dental implants.
- Improve bone contact rate (BCR)
- The BCR of Non-activated implants is about 50-60% and activated implants can increase to over 90%
- Shorten dental restoration time
- Dental restoration time: Reduced from 3 months to 1 month
- Expanding implant adaptation
- Improved implant success rate for high-risk dental treatment
- Rapid activation – Activation only takes 10s
- Ozone sterilization Built-in ozone filtration to prevent leakage
- Vacuum UV
- Ultra High Implant Compatibility (S, L, M1.4, M1.6, M2.0)

R79,900

IMPROVE ACCURACY
Precise measurements for better outcomes

INCREASE SUCCESS RATE
Higher stability, faster healing and better osseointegration

SAFE & RELIABLE
Advanced technology for patient safety

SAVE TIME
Fast, simple and efficient procedures

SMART INVESTMENT

DENTAL NOLA DRY FIELD CHEEK/LIP RETRACTOR SUCTION SYSTEM

Used In Various Oral Treatment Scenarios Such As Pit And Fissure Sealants, Posterior Restorations, Bonding Ortho Brackets, Teeth Bleaching / Whitening

- Dry Field System keeps the mouth dry while isolating arches from tongue and cheeks.
- High-heat plastic and silicone construction autoclavable to 135 degrees
- Great for sealants, ortho bonding, and posterior restorations
- Combined into each appliance is an adjustable cheek retractor, saliva ejector, tongue guard and low-volume suction connection.
- Specially designed not to cover occlusal surfaces of the teeth.
