Frequently Asked Question

Which one is better Between HyperLight-G and V-Light?

Whats the FACTS !

- The focal spot size directly impacts the spatial resolution and image quality of the resulting X-ray images.
- Smaller the focal Spot the Sharper the image.
- Our V-light (0.4mm) Is more superior to Hyper Light-G (0.7mm)

Model	V-Light	HyperLight-G
Picture		
Tube Voltage (kV)	65	65
Tube Current (mA)	2.5	2
Focal Spot (mm)	0.4	0.7
Exposure Time Range (Sec)	0.02 – 2	0.02 – 2
Maximum duty cycle	1:30	1:30
Gross weight (kg)	1.8	1.9
Battery	One full charge: up to 500 shots (Exposure time: 0.5s)	One full charge: up to 300 shots (Exposure time: 0.5s)
Smart angulation system	✓	✓
Dimension	L:300mm W:110mm H:250mm	

Our V-Light is lighter and has a much more powerful Battery Capacity – **40% more**

Our V-Light now comes with the back scatter **radiation Shield**

COMPLIANT

National Environment Management Act, 1998
Act No. 107 of 1998

AMALGAM SEPARATOR

Effective 31 March 2025

Deadline 31 March 2026

All dental facilities are required to comply with best management practices and requirements to operate and maintain an amalgam separator according to its manufacturer's recommendations, as required by the Act.

DEADLINE HAS NOW PASSED

PHASING-DOWN DENTAL AMALGAM

1. Dental amalgam may only be used in pre-dosed encapsulated form which may not exceed 0.58 ml.
2. A person or an organ of state that owns or is in control of a dental facility in which dental amalgam is used, or where dental amalgam fillings or teeth containing such fillings are removed, must ensure that their facilities are equipped with amalgam separators for the retention and collection of amalgam particles, including those contained in used water.
3. The dental facilities referred to in subregulation (2) must ensure that amalgam separators in use from 1 April 2026, provide a retention level of at least 95% of amalgam particles.
4. Amalgam separators must be maintained in accordance with the manufacturer's instructions to ensure the highest practicable level of retention.
5. A dental practitioner may not release amalgam directly or indirectly into the environment under any circumstances.
6. A person or an organ of state that import or export dental amalgam capsules, must develop a Mercury Phase-down Plan for dental amalgam.
