DX.Universal/Anterior/Posterior Nano Hybrid Light Cure Composite is a light curable composite. It can be used for anterior and posterior dentine and enamel restorations. The inorganic filler loading is from 75 % to 82% by weight. The particle size varies from 0.03 to 5 microns.

DX. Universal

Light Curing Composite Resins family, the first choice for reconstruction of tooth defects.

DX. Universal Composite is a light curable composite. It can be used for anterior and posterior dentine and enamel restorations. The inorganic filler loading is 82% w/w

. The particle size varies from 0.002 to 5 microns.

Indications:

It is suitable for restoration of Class I to V cavities including tooth defect, inlay, veneer and core building up.

Advantages:

- High versatility. It takes care of either dentin or enamel restorations
- Moderate viscosity and non-sticky handling
- Excellent plasticity and great handling
- High radio opacity
- 2g Syringe
- Long Shelf life

R699

YEAR
end SALE

This product consists of double Intertwined polishing wheels. It is easy use for variety of applications. It can polish the areas where other wheels could not reach (e.g., occlusal surface). It works well for composites, glass ionomer and other materials without changing the original shape and damage to the polished material.

- 1.Coarse polishing
- 2.Moderate polishing
- 3.Fine polishing

R499

Max 1 per customer

Indications:

Composite restoration polishing and excess part removal, implant cleaning up, and polishing of inlay/onlay and crown restorations.

DEN CEM HANDMIX Self Adhesive Dual Cure Resin Cement

Indication for use :

DEN CEM II is suitable for cementation of crown and bridge which made of PFM or Zirconia. It is a liquid-powder form.

Advantages:

High bonding strength: Compare with glas ionomer cement, DEN CEM II has a good bonding strength and flexural strength.

Economic: One set can be used to fix at least 100 teeth. It is more economic in comparison with automix design

- **Chemistry Stability:** Liquid and powder are designed to be packed in separate bottles. The chemistry properties are more stable and can be stored in normal room temperature and no need of refrigeration

- Dual cure: Light cure and self cure for better choice
- Low solubility

Radiopaque

Fluoride releasing

Packaging Specifications:

Refill 8ml liquid + 15g powder Universal

**YEAR

Before

After

DX. Whiten composite belongs to Enamel shade composite system. In clinic practice, two or three kinds of veneer whitening composites are used to repair veneer. The whitening simulation is successfully achieved with nature tooth appearance.

Indications: • Discolored veneer and composite inlay

Advantages: Three shades of stratified filling to rebuild the layering of tooth Ideal viscosity, easily to shape High simulation, natural esthetic

• Good polishability and durability Packaging

Specifications:

- Specification: 4g
- Shade: EXW (Exetreme white), EW (Enamel white), BL(Bleach)

Increased transparency from EXW to BL

Product Features:

The DENCOVER (Light Cure Liquid Polish), after light-curing, forms a smooth and glossy resin film on the surface of the resin, which can reduce the occurrence of surface staining on resin restorations.

R399

Max 1 per customer

Scope of Application:

PERIOSTEAL SOFT BRUSHING KIT

The concept of the Soft Brushing technique is to softly disrupt the organization of the collagen fibers of the fibrous periosteum so they can be displaced apically off the bone exposing the roots and bone. The Brushes in the kit reduce the stiffness of the fibers that permits the flap to be reflected and released only by using the Brushes.
