WHICH PORTABLE XRAY IS RIGHT FOR YOU?

Frequently Asked Question – Which one is better Between HyperLight-G and V-Light

WHATS THE FACTS!

The focal spot size directly impacts the spatial resolution and image quality of the resulting X-ray images.
Smaller the focal spot the Sharper the image.
Our V-light (0.4mm) is more superior to Hyper Light-G (0.7mm) ✓

Our V-Light now comes with the back scatter radiation Shield ✓

FEATURES	HYPERLIGHT/V-LIGHT	HYPERLIGHT-G	WINNER
Picture			👑 V-LIGHT
Tube Voltage (kv)			SAME
Tube Current (mA)	2.5	2	V-LIGHT
Focal Spot (mm)	0.4	0.7	V-LIGHT (Smaller is better)
Exposure Time Range (Sec)	0.02 – 2	0.02 – 2	SAME
Maximum Duty Cycle	1:30	1:30	SAME
Gross Weight (kg)	1.8	1.9	V-LIGHT (Lighter)
Battery	Up to 500 shots (Exposure time: 0.5s)	Up to 300 shots (Exposure time: 0.5s)	V-LIGHT (40% More Capacity)
Smart Angulation System	✓	✓	SAME
Dimension (LxWxH)	L:300mm W:110mm H:250mm	L:300mm W:110mm H:250mm	SAME

WHY CHOOSE V-LIGHT?

- LIGHTER & MORE PORTABLE**
Weighs less for effortless handling and mobility.
- LONGER BATTERY LIFE**
40% more shots per charge for uninterrupted performance.
- SHARPER IMAGES**
Smaller focal spot (0.4mm) delivers crisper, high-resolution images.
- BUILT-IN PROTECTION**
Comes with Backscatter Radiation Shield for safe operation.
- SMART ANGULATION**
Built-in intelligent angulation for perfect positioning every time.

mercury

5. PHASING-DOWN DENTAL AMALGAM

- 1 Dental amalgam may only be used in pre-dosed encapsulated form which may not exceed 0.58 ml.
- 2 A person or an organ of state that owns or is in control of a dental facility in which dental amalgam is used, or where dental amalgam fillings or teeth containing such fillings are removed, must ensure that their dental facilities are equipped with amalgam separators for the retention and collection of amalgam particles, including those contained in used water.
- 3 The dental facilities referred to in subregulation (2) must ensure that amalgam separators in use from 1 April 2026, provide a retention level of at least 95% of amalgam particles.
- 4 Amalgam separators must be maintained in accordance with the manufacturer's instructions to ensure the highest rate level of retention.
- 5 A dental practitioner may not release amalgam directly or indirectly into the environment under any circumstances.
- 6 A person or an organ of state that import or export dental amalgam capsules, must develop a Mercury Phase-down for Dental amalgam Plan for dental amalgam.

AMALGAM SEPARATOR

- ✓ Global certification, TUV tested, complies to BS EN ISO
- ✓ 2 year parts warranty
- ✓ This is Europe's most cost effective Amalgam separator
- ✓ Not electrical (no power required)
- ✓ No running costs
- ✓ No maintenance
- ✓ No servicing
- ✓ No hidden costs
- ✓ Separate Installation (dependent on location etc)
- ✓ Silent operation
- ✓ 100% recyclable
- ✓ Fits both dryline and wetline suction systems
- ✓ No rotors/collector cups
- ✓ Easy fit

SIMILAR TO i-JET

Prophy Jet is a must-have device in every dental office due to its wide application and benefits in dentistry. The device is versatile, efficient, and gentle, and provides a comfortable experience for the patient. Investing in a Prophy Jet will not only improve the quality of dental care provided but also save time for both the dentist and the patient. The device is also an excellent investment in the long-term oral health of patients. Dental professionals should consider adding the Prophy Jet to their arsenal of tools to provide the best possible care to their patients.

PERIOSTEAL SOFT BRUSHING KIT

The concept of the Soft Brushing technique is to softly disrupt the organization of the collagen fibers of the fibrous periosteum so they can be displaced apically off the bone exposing the roots and bone. The Brushes in the kit reduce the stiffness of the fibers that permits the flap to be reflected and released only by using the Brushes.

**GRAND
LAUNCHING
OFFER!**

IMPLANT STABILITY METER

A stability measuring device that uses tapping method, which measures the time of the Tapping Rod of the device contacting the implant. Used for dentistry and dental implantology or oral cavity, or abutment, to measure the stability.

The result of the measurement is displayed in ISQ scale (Implant Stability Test), which is the numerical representation of the ISQ value, and higher scale represents greater implant stability or lower implant mobility.

FEATURES

- ✓ Convenient usage due to small and light design
- ✓ Easy to use due to simple controlling method
- ✓ Fast measuring time less than 3 seconds
- ✓ Safe measurement due to slight tapping technique and auto safety system (tapping stops after tapping twice when Osseointegration is unstable, otherwise taps up to 6 times.)
- ✓ Available to check possibility of implant failure at in earlier stages

R24,900

This model is much simpler to use than the NSK model.

With the NSK model, you need to install a probe on the implant first. With this model, you can see the ISQ value on the display screen by gently tapping the implant. From the numerical value determine the stability of the implant.

IMPLANT LOCATOR

R9,900

- ✓ Handy piece of equipment in Implant Dentistry
- ✓ Especially for 2 stage dental implant surgery
- ✓ Can have a minimal invasive uncovering of the implant with the Locator
- ✓ No more Guess Work !
- ✓ Work faster, easier, simpler and smarter !!

EASY TO USE

ACCURATE MEASUREMENT

MINIMAL INVASIVE UNCOVERING

IMPLANT UV ACTIVATOR

- ✓ It can use vacuum ultraviolet rays to catalyze and activate the surface activity of implants
- ✓ Improve the rate of osseointegration
- ✓ Shorten the time of bone healing
- ✓ Accelerate the clinical osseointegration of dental implants and improve the success rate of dental implants.
- ✓ Improve bone contact rate (BCR)
- ✓ The BCR of Non-activated implants is about 50-60% and activated implants can increase to over 90%
- ✓ Shorten dental restoration time
- ✓ Dental restoration time: Reduced from 3 months to 1 month
- ✓ Expanding implant adaptation
- ✓ Improved implant success rate for high-risk dental treatment
- ✓ Rapid activation – Activation only takes 10s
- ✓ Ozone sterilization Built-in ozone filtration to prevent leakage
- ✓ Vacuum UV
- ✓ Ultra High Implant Compatibility (S, L, M1.4, M1.6, M2.0)

R79,900

DEN CEM HANDMIX

Self Adhesive Dual Cure Resin Cement

INDICATION FOR USE :

DEN CEM II is suitable for cementation of crown and bridge which made of PFM or Zirconia. It is a liquid-powder form.

NEW PRODUCT LAUNCH

ADVANTAGES

HIGH BONDING STRENGTH

Compare with glass ionomer cement, DEN CEM II has good bonding strength and flexural strength.

ECONOMIC

One set can be used to fix at least 100 teeth. It is more economic in comparison with automix design.

CHEMISTRY STABILITY

Liquid and powder are designed to be packed in separate bottles. The chemistry properties are more stable and can be stored in normal room temperature and no need of refrigeration.

DUAL CURE

Light cure and self cure for better choice.

LOW SOLUBILITY

Radiopaque
Fluoride releasing

DENTAL NOLA DRY FIELD CHEEK/LIP RETRACTOR SUCTION SYSTEM

Used In Various Oral Treatment Scenarios Such As Pit And Fissure Sealants,
Posterior Restorations, Bonding Ortho Brackets, Teeth Bleaching / Whitening

- ✓ Dry Field System keeps the mouth dry while isolating arches from tongue and cheeks.
- ✓ High-heat plastic and silicone construction autoclavable to 135 degrees
- ✓ Great for sealants, ortho bonding, and posterior restorations
- ✓ Combined into each appliance is an adjustable cheek retractor, saliva ejector, tongue guard and low-volume suction connection.
- ✓ Specially designed not to cover occlusal surfaces of the teeth.
